     File "src\gen_files\create_data_files.py", line 301, in rec_fill_name_to_path_dict
   FileNotFoundError: [WinError 3] The system cannot find the path specified: 'C:\\urm\\workspace-1.0.0.2-URM\\java\\tests'
   [15828] Failed to execute script 'main-RefactoringAssistant' due to unhandled exception!
   Press any key to close the program :)_
   ```
   Or this:

   ```
   RefactoringAssistant_Shortcut                                              —   □   ×
   Opening the application.. please wait
   Could not find path to test folder
   Please enter the path to test folder.
   It should something like this: C:\urm\workspace-1.0.0.2-URM\alma_itest_ux\src\test
   _
   ```

   If so.

   a. Find the absolute path to your test directory:

   ```
   Project  ▼                              ⊕ ⤒ ⤓  ⚙ —    C̈ Ad
   ∨  alma_itest_ux  C:\urm\workspace-1.0.0.2-URM\alma_itest_ux    Q▾ rej
        > .idea                                              116
        > .settings                                          117
        > external_test_data                                 118
        > Parameters                                         119
        > Profile                                            120
        ∨ src                                                121
           > main                                            122
           ∨ test                                            123
              ∨ java                                         124
                 ∨ tests                                     125
                    > acq                                    126
                    > acqNG
                    > acqNGAT
   ```

b. Paste it to the dialog, or you can overwrite the text file in this path:
C:\Users\{your user name}\AppData\Local\RefactoringAssistant\test_project_base_path.txt

Notes:

- With any issues, just delete all the relevant files folders on your computer and run the installer again.
- Please ask for help!
